

Name \_\_\_\_\_

Answer every question.

You should spend about 30 minutes on this section.

### Question 1

Complete the following sentences by filling in the blank spaces with the correct word(s).

- (a) An \_\_\_\_\_ is a device that measures electric current.
- (b) An electromagnetic is a magnet that can be turned on and off using \_\_\_\_\_.
- (c) Pressure is equal to \_\_\_\_\_ divided by area.
- (d) \_\_\_\_\_ occurs when light changes direction as it enters water.
- (e) The pitch of a sound depends on the sound's \_\_\_\_\_.
- (f) The planet \_\_\_\_\_ is between Saturn and Mars.
- (g) \_\_\_\_\_ is the way in which heat energy can travel through a vacuum.

[7]

### Question 2

The graph opposite shows how the distance of a child varies in time.

- (a) Estimate the distance covered by the child after 3.5 seconds.

\_\_\_\_\_

- (b) How long does it take the child to cover 3 metres?

\_\_\_\_\_

- (c) What is the child's average speed?

average speed = \_\_\_\_\_

**Question 3**

Draw in the space below an electrical circuit containing four 2V light bulbs, a 4V battery and one switch. All of the light bulbs should operate at full brightness, two of them should be controlled by the switch.

[4]

**Question 4**

(a) Describe the energy changes that occur when a light bulb is powered by a battery.

-----  
-----  
-----  
-----

[3]

(b) How are 'energy efficient' light bulbs different energy wise from traditional filament light bulbs?

-----  
-----  
-----  
-----  
-----

[2]

**Question 5**

A seesaw of length 10m is pivoted about its centre.

On one side a boy of weight 500N sits 4m from the pivot.

A woman of weight 800N sits on the other side.

How far must she sit from the pivot in order to balance the seesaw?

-----  
-----  
-----  
-----

[3]

**Question 6**

(a) Name the nearest planet to the Moon.

-----

[1]

(b) Roughly, how long does it take the Moon to perform one orbit around the Earth?

-----

[1]

**Question 7**

With the aid of a diagram, describe an experiment that compares how well different materials conduct heat energy.

-----

-----

-----
